Professional abilities:

- Autonomy, organizational abilities and interpersonal skills ;
- Synthetic and analytical thinking, integrity, rigor, and tenacity ;
- Oral and written competencies; ability to communicate succinctly the quality standpoint ;
- Good IT skills (MS Office, PDM, Customer scorecards and customer Portals),
- Proficiency in English; knowledge of some other customer language(s), such as French, German, Chinese, are recommended.

Technical knowledge:

- Knowledge of core automotive Quality tools, such as: QSE² audit supports (customer, pre-production, and/or VD6.3), Control Plan, Statistical Process Control (SPC), Measurement System Analysis (MSA), Problem-Solving (8D, etc.) approach, QRQC approach ;
- Knowledge of Production Part Approval Process (PPAP);
- Technical skills; ability to analyze and understand all technical decisions made by the project team ;
- Knowledge of Functional Analysis and FMEA (Product, Process, etc.) ;
- Basic knowledge of Project Development steps, Advanced Product Quality Planning (APQP);
- Knowledge of AKWEL QSE²MS MAN02, CLI03 and CLI05, including AKWEL Manufacturing System;
- Knowledge of automotive customer specific requirements affecting the product line ;
- Basic knowledge of QSE² management standards (IATF 16949, ISO 9000, ISO 14001...).

MISSION

She/he introduces, monitors and validates the good practices for Quality procedures of Products/Process

- Acts as the Customer representative within the Production team, and therefore ensures the respect of the customer's requirements, targets and satisfaction;
- Takes part in QRQCs,

- Is bound by the duty to alert his manager in the event of risks (for instance: Quality incident, failure to control a significant characteristic, etc.) with no identified satisfactory solution and involving potential or real reputation or financial impacts internally or at the Customer;
- Ensures the deployment and implementation of the Quality tools and procedures in production;
- Coordinates the problem solving activities (AKWEL Customers for 0km or Warranty return, AKWEL Inter-sites and/or AKWEL Suppliers incidents, alerts, etc.) and/or put forward the appropriate tools/measures. She/He verifies the action plan efficiency.
- Is aware and follows up the control of significant characteristic in production by identifying the sensitive processes,
- Performs the QSE² audits (VDA6.3, FIEV, LPA, product or other equivalent audits), and follows up the relevant action plans when necessary on AKWEL manufacturing plants or AKWEL suppliers,
- Ensures the introduction of suitable measures at the customer according to the performance, risks and results;
- Works in close collaboration with Production teams, Project team, Purchasing teams and/or AKWEL Suppliers teams if need be; and assists them in the event of problems (customer or internal) related to products/processes. He manages the concession and containment (rework / quality wall) activities for AKWEL Customers and/or AKWEL Inter-sites,
- Conduct the acceptance of AKWEL inter-sites or AKWEL Suppliers,
- Takes part in the continuous improvement of processes performance by issuing proposals and contributing to the continuous improvement plan.
- She/he ensures that the customer requirements are taken into account.
- Must apply all Quality, Environmental, Safety and Energy procedures and operating instructions within the framework of operations linked to his/her job and the rules defined by the Group.

Agrees to act in accordance with the ethical rules of the Group

Localization: Orizaba (plant), Mexico
Department : Product Line
